Experience

Resolution Games — Stockholm, SE

Tech Lead Project (Spatial Ops) (March 2023 - Present)

Gameplay Programmer (Jul 2022 - Feb 2023)

- **Systems Architecture:** Implemented a 3D Grid A* Pathfinding algorithm specifically optimized for flying AI agents to navigate dynamic, real-world room geometry via Spatial Mapping data.
- Implemented a NetworkObject/GameObject Pooling System alongside UniTask for high-performance asynchronous operations.
- **Procedural World Generation:** Engineered a deterministic, seed-based world generator in Unity/C#, using a river-network skeleton, fractal noise, stream-power hydraulic erosion and D8 flow-accumulation hydrology.
- **Tooling & Automation:** Engineered custom Unity/C# tools, including a Bot State Machine Editor, a Campaign Event Designer, and an AI agent-driven automated playtesting agent (utilizing Claude to process game state data and autonomously playtest builds).
- **Performance Optimization:** Optimized game stability and resource usage by leveraging the Unity Profiler and Memory Profiler to eliminate leaks and Xcode to resolve native crashes. Utilized Project Auditor to proactively catch configuration bottlenecks and Profile Analyzer to validate performance gains across different builds, ensuring a rock-solid framerate.
- **Live Game Analytics:** Integrated Telemetry Analytics and Unity Crash/Exception reporting to monitor live game health and resolve critical bottlenecks.
- **Technical Leadership:** Led a team of 8 engineers to deliver Spatial Ops, a high-fidelity Mixed Reality (MR) FPS. Coordinated cross-functionally with over 10 departments to ensure seamless feature integration.
- **Production Management:** Oversaw code team management, milestone planning, and task distribution. Collaborated with the Creative Lead on feature roadmaps and technical feasibility.

Deep Dive Studio — Singapore, SG

Senior Gameplay Programmer (Dec 2019 - Mar 2022)

- **Unreal Multiplayer Architecture:** Engineered client-side multiplayer systems and core combat mechanics for *Virtual Taekwondo* utilizing a hybrid C++ and Blueprint approach in Unreal Engine, balancing high-performance network execution with rapid designer iteration.
- **Backend & Cloud Architecture:** Architected full-stack backend infrastructure using Node.js on AWS Lambda (Serverless), building high-scalability services to power match data, player telemetry, and core game logic.
- **Multiplayer Systems:** Developed multiplayer networking system for a Go(Chess) game using gRPC in Go (backend) and Unity C# (client).
- **Engine Integration:** Architected motion capture pipelines in Unreal Engine, implementing integration via Live Link and Animation Blueprints.

Isentric Ltd — Jakarta, ID

Gameplay Programmer (Mar 2019 - Dec 2019)

- Developed scripted AI using Behavior Trees to simulate realistic player patterns and improve user engagement for Poker and Capsa.
- Successfully shipped two mobile casino titles for the Android platform.

Visual Expert Animation — Jakarta, ID

VR Game Developer (Oct 2017 - Feb 2019)

- Engineered an interactive AR Wall Game utilizing Xbox Kinect for motion tracking and gesture recognition.
- Integrated hardware and software by developing a horse-racing game that utilized microcontrollers for custom motion detection.

FXmedia Pte Ltd — Singapore, SG

Game Developer (Sep 2016 - Sep 2017)

- Practising debugging and profiling to secure from any performance problems.
- Developed gamified e-learning platforms for high-profile clients, including NUS Nursing Studies.

Nusantara Beta Studio — Jakarta, ID

Game Developer (Mar 2015 - Aug 2016)

- Implemented Object-Oriented Programming (OOP) principles in C# and Unity to enhance code maintainability and optimize the mobile game development lifecycle.

Technical Skills

Languages: C#, C++, Javascript

Engine/ Frameworks: Unity, Unreal, Node.js

Tools: AWS (Gamelift, Lambda, DynamoDB, Cognito, API Gateway, Cloudwatch), Azure playfab, Photon, Google analytics, Unity crash report, Github action, Jenkins, Miro, Lucidchart, Jira, Favro, Notion, Git, UVC, Figma, Zeplin, Adobe Photoshop.

Education

Bachelor's degree, Computer Science

Syarif Hidayatullah Jakarta Islamic State University

GPA 3.54/4.00

Cum Laude, Bank Indonesia Scholarship

Jakarta, ID

Aug 2012 - Nov 2018
